

Kai Williams

Profile

Information Technology and Cybersecurity students with experience supporting data-focused initiatives, technology operations, community leadership, and customer-facing systems. Skilled at translating technical needs into practical solutions, organizing work across teams, documenting processes, and maintaining efficient operations in fast-paced agile environments.

Professional Experience

TD Bank, N.A.

June 2026 to Present

2026 Summer Internship Program – Audit

- Assist with integrated IT audits across multiple business lines by reviewing system processes, control design, governance practices, regulatory and internal standards, and related technology controls to support risk assessment and determine audit scope.
- Evaluate business processes, applications, and third-party technology controls to understand operational risks, control effectiveness, performance expectations, incident management practices, and alignment with established audit standards.
- Collaborate with business teams, vendor management stakeholders, and cross-functional partners to document control processes, identify root causes of control gaps, track corrective actions, and support timely remediation efforts.
- Built PowerBI platform consolidating pRCM processes from legacy application, streamlining data collection into core audit workflow and eliminating manual data transfers. System enables teams to slice and filter assessments by business line, business unit, and other dimensions, while standardizing practices across entire audit division and enabling faster, more informed decision-making

Tulane Connolly Alexander Institute for Data Science (CAIDS)

August 2025 to Present

Data Research Intern

- Led collaborative projects across nine Tulane departments, institutes, and non-profit organizations using Scrum methodology to manage tasks, guide teams, and deliver results for campus and community initiatives.
- Partnered with groups including Tulane Law School and the Murphy Institute to improve systems, streamline processes, and enhance access to information and resources.
- Supported long-term project sustainability by training partners on organization and documentation practices to ensure consistency in future collaborations.

Tulane Housing Resident Life

August 2025 to Present

Residential Assistant, Warren House

- Supported a residential community of more than 200 students by enforcing policies, upholding community living standards, and promoting a safe living environment.
- Responded to crisis situations by connecting residents with appropriate resources and maintaining professional documentation practices.
- Developed communication, conflict resolution, and crisis management skills through direct student support and incident response responsibilities.

Tulane Newcomb Institute

January 2025 to Present

Information Technology Intern

- Maintained technology, equipment, and inventory across 20 office spaces, 3 classrooms, and a gallery to support efficient daily operations.
- Resolved urgent presentation technology issues under time pressure, restoring system functionality

and allowing meetings to continue without interruption.

- Provided responsive support to staff and faculty by completing requests promptly and maintaining reliable technology systems.

**Tulane Connolly Alexander Institute for Data Science (CAIDS)
2025**

August 2024 to August

Data Ambassador

- Promoted data literacy across Tulane communities through projects completed using Scrum methodologies.
- Took initiative during outreach events to communicate CAIDS' mission and encourage student engagement with data literacy initiatives.
- Collaborated with students from diverse academic backgrounds to increase awareness of data representation, interpretation, and manipulation.

Walmart Inc.

June 2023 to June 2025

Online Grocery Pickup Associate

- Used handheld hardware and proprietary software to locate, verify, and manage online grocery orders efficiently.
- Delivered orders while meeting daily fulfillment quotas and performance metrics, averaging a five-minute turnaround from facility to customer vehicle.
- Monitored system alerts and order status updates to support workflow efficiency and reduce downtime.

Education

Tulane University, School of Professional Advancement
Bachelor of Science, Information Technology/Cybersecurity
Cumulative GPA: 3.6

May 2027

- Posse Foundation Full-Tuition Leadership Scholarship — \$66,577

Publications/licenses/Professional designations/ Certifications

CompTIA A+ Core 1 and Core 2 — Complete
CompTIA Security+ — In Progress

Presentations at Conferences and Seminars

Participant, Cybersecurity Hackathon — October 2024

Affiliations

Tulane Cybersecurity Team — 2024
Tulane Connolly Alexander Institute for Data Science — 2024 to Present
Tulane Data Collective — 2025 to Present

Skills

Computer skills: Microsoft Excel, Qualtrics, proprietary retail systems, hardware troubleshooting, technology support, documentation, data literacy, Scrum methodology
System: Networking, incident response, troubleshooting, technology operations
Languages: English
